Introduction

The ICREM series started in 2018 hosted by the Chiang Mai University (ICREM-2018), with a vision to make it to an annual gathering of local and international experts and students in the field. Teamed with the world renown Thai hospitality and climate, the location of the ICREM is foreseen to remain in Thailand, with the ICREM2019 hosted by the Mahidol University Salaya Campus located at the eastern outskirts of Bangkok. *Please use this template in preparation of your abstract for the ICREM-2019.*

Description of the Work or Project

The International Conference on Radiation and Emission in Materials (ICREM) covers the radiation and emission phenomena in its natural combination, in the range from accelerated ionizing particles to THz electromagnetic radiation, building on the similarity of the basic principles and multi-functional applications. The mission of the ICREM is to bring new perspectives to the field of the radiation phenomena in advanced materials by providing a forum for researchers and industrialists for exchanging data and ideas. The focus is on advances in fundamental understanding as well as its exploitation in modern instrumentations (scientific, technological, medical, etc) and technologies/ devices.

The body of the abstract should be justified center. The maximum length of the abstract is one page. The abstract shall be prepared on A4 paper (8.27-in x 11.69 in. or 210 mm by 297 mm) with 1-inch (25mm) margins on all sides. The font size shall be 12-point Times New Roman (or equivalent) with single spacing. Keywords shall be added to the bottom of the abstract. Below is an example Table (or Figure).

Table (or Figure): Name, insert table or figure in a text or picture box with format arranged to wrap text around if single column width is insufficient (display table with or without grid).

Column 1	Column 1	Column 1	Column 1
Row 1			
Row 2			

Abstracts will be published and made available in a web based format for easy access during the meeting. Adherence to this format will allow our attendees to have easily access and learn about your project. Abstracts that do not conform to this template may be returned to the author for correction.

Conclusions

Authors are encouraged to provide in sufficient detail any significant findings or results of their work to enable the paper reviewers to have a clear understanding of the importance of the work or project. We look forward to seeing you at the ICREM-2019.

Keywords: Radiation phenomena; Nuclear radiation; Plasma technology; etc.
